Lab Task 2

Week - 3

Instructor	Aliza Saeed
Semester	Spring 2022

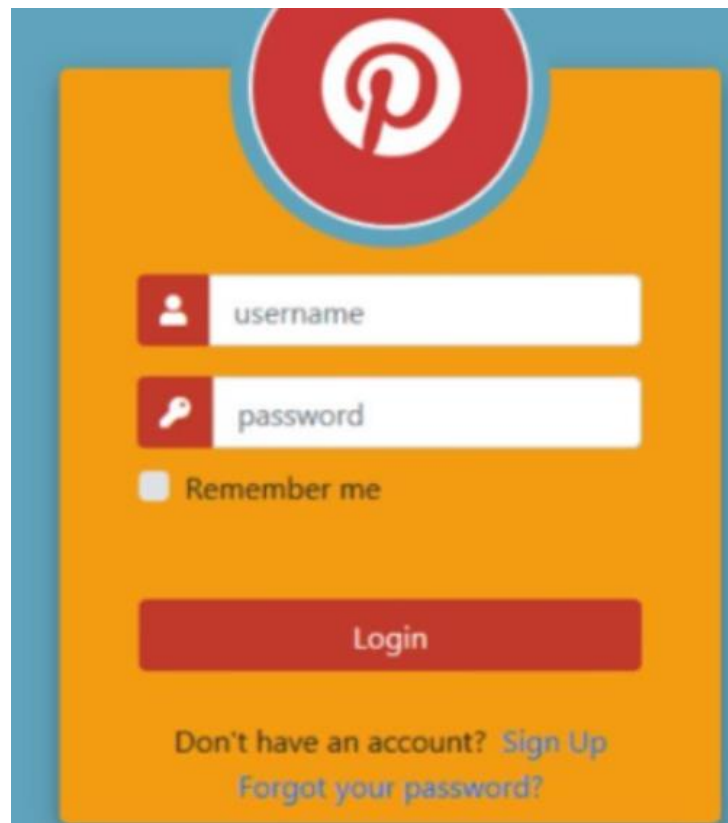

FAST School of Computing

Instructions:

- ✚ Before starting, firstly read/understand all tasks.
- ✚ Complete your lab tasks till Deadline = 21st March 2022 (Monday) 4:00 pm.
- ✚ Take a Screenshot of all designed forms as well as source code page and paste all on Word file.
- ✚ Submit Your screenshot's Word file as well as Visual file (Project application).
- ✚ Submit your tasks on Google Classroom.
- ✚ Complete your lab tasks by yourself.

Windows Form Lab Task

- You have to design two forms separately.
- One for login and other for registration.
- **For Login:** Follow the given form (Form should be well designed).
- When the login button is clicked, the form should navigate to registration form (by using Forms connectivity)

The image shows a login form template. At the top is a red circular logo with a white 'P'. Below it is an orange rectangular area containing the form elements. The form has two input fields: 'username' and 'password', each with a red icon (a person and a key respectively) to its left. Below these is a checkbox labeled 'Remember me'. A red button labeled 'Login' is positioned below the checkbox. At the bottom of the orange area, there are two links: 'Don't have an account? Sign Up' and 'Forgot your password?'. The entire form is set against a light blue background.

For Registration Form:
